Members of the 'frizzled' gene family encode 7-transmembrane proteins that are receptors for Wnt signaling proteins. Frizzled homolog 7 (Fzd7) contains an intracellular C-terminal tail with a PDZ domain-binding motif. Fzd7 seems to downregulate APC function and enhances beta-catenin-mediated signals.

Buffers
Purified rabbit polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column and eluted out with both high and low pH buffers and neutralized immediately after elution then followed by dialysis against PBS.

Immunogen
KLH conjugated synthetic peptide.

Application:
Tested by peptide-specific ELISA (1:1,000).

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C. Avoid repeated freeze-thaw cycles.
